## High Performance with Brushless DC Motor

### Brushless DC motor

- Maintenance-free due to no brush.
- Energy production is more efficient than brushed DC motor because of no friction loss caused by brushes, enabling to lower amperage for reduced heat production and increased work amount on a single full battery charge.

### More work amount on a single full battery charge

- Thanks to the very efficient energy production of BLDC motor, work amount on a single full battery charge is increased.
- Life time work amount of a battery is increased, reducing the battery cost.

### Brushless DC motor

- Use of BLDC motor lowers heat production; the temperature rise at housing surface can be recessed well even in hard industrial applications requiring continuous long operation.

Powered by two 18V Li-ion batteries in series

18V + 18V → 36V

Two 18V Li-ion batteries can be directly installed on the machine to supply energy to the powerful 36V DC motor drive system.

The compatible batteries are:

1.5Ah BL1815N

2.0Ah BL1820

2.0Ah BL1820B

3.0Ah BL1830

4.0Ah BL1840

4.0Ah BL1840B

5.0Ah BL1850

5.0Ah BL1850B

When different capacity batteries are used together (for example, 1.5Ah BL1815N and 3.0Ah BL1830, or fully charged BL1830 and 70% charged BL1830), the machine stops when the battery with less capacity gets empty.

## 18+18V

### Cordless Chain Saw

**DUC252Z: 18+18V**

#### 1 New adjustment system for easier tool-less saw chain tension adjustment.

Extendable lever

- allows for easier saw chain tightening and higher tightening torque.
- can be quickly retracted at any angle
- reduces the area projecting from sprocket cover.

Dial for easier saw chain tension adjustment

#### 4 Battery capacity warning lamp

- When remaining battery capacity decreases below a certain limit, the motor automatically stops and solid red light reminds you to replace battery.
- One warning lamp for each individual battery.

#### 5 Front-hand-guard activated kickback brake

- Push of front hand guard stops the blade instantaneously.
- Anti-kickback guard is not needed on the tip of guide bar, increasing blade maneuverability for a wider range of applications.

#### 2 Chain oil level window

allows to check how much oil is left from outside

#### 3 XPT (Extreme Protection Technology)

for use in outdoor applications or harsh environments, protection from dust and dripping water is enhanced.

#### 6 Soft Grip

for non-skid operation

MAKITA MINI 4-STROKE ENGINE

## High Performance in Compact Design

Makita 4-Stroke Engine delivers high torque and horsepower.

Max. Torque and horsepower of Makita 4-Stroke Engine are almost the same as those of an equivalent 2-Stroke engine as shown below in the chart.

Compared with the conventional 4-Stroke Engines, Makita 4-Stroke Engine produces approximately 20 to 30 % more power thanks to its high combustion efficiency and new developments such as compact spark plug.

Additionally, by employing a unique lubrication system, it has obtained the smallest in class exterior physical dimensions among the 4-Stroke Engines available in the market today.

	25mL Class		
	24.5mL 4-Stroke Engine	24.5mL 4-Stroke Engine	24.5mL 2-Stroke Engine
Max Power (PS-rpm)	0.97/7000	1.1/7000	0.98/7000

	35mL Class	
	33.5mL 4-Stroke Engine	30.5mL 2-Stroke Engine
Max Power (PS-rpm)	1.45/7000	1.3/7000

	43mL Class	
	43mL 4-Stroke Engine	42.7mL 2-Stroke Engine
Max Power (PS-rpm)	2.1/7000	1.8/7000

## Patented Unique Lubrication System enables to use 4-Stroke Engine in Full Multi-position.

Employing this system enables to use 25.4mL Brushcutters on any slope such as ditch slopes, river banks or mountain woods.

The natural pressure changes in the crankcase caused by the piston movement in the cylinder are harnessed to pump the oil throughout the engine.

Oil is pumped from a reservoir in the base of the engine through a network of one-way valves for reliable lubrication and long service life without the need to keep the engine level.

## Clean Exhaust Emissions

Compared with an equivalent 2-Stroke Engine, exhaust emission is drastically reduced to comply with strict regulations in the world, including CARB Tier 3 (California, USA), EPA Phase 2 (USA) and EU Stage 2 (Europe). As shown in the table to right, the exhaust emission level of Makita 4-Stroke Engine is well below the standard level of the regulations.

	24.5mL	25.4mL	33.5mL	43.0mL	75.6mL
Certification/ Standard level of Emission Gas: HC+Nox (g/kw-hr)	24.5mL < 50mL CARB/ EPA/ EU "50"	25.4mL < 50mL CARB/ EPA/ EU "50"	33.5mL < 50mL CARB/ EPA/ EU "50"	43mL < 50mL CARB/ EPA/ EU "50"	75.6mL ≥ 50mL CARB/ EPA/ EU "72"
Certified level of Makita 4-Stroke engine: HC+Nox (g/kw-hr)	27	25	21	17	16
Certified level of an equivalent 2-Stroke engine: HC+Nox (g/kw-hr)	240 (21mL)	205 (24.5mL)	201(30.5mL)	205(40.2mL)	204(48.6mL)

## Low Running Cost

From our comparison test between Makita 4-Stroke Petrol Brushcutter and an equivalent 2-Stroke Petrol Brushcutter, the superiority of Makita 4-Stroke Engine over 2-Stroke Engine in its class has been proved both in fuel consumption and total cost as shown in the charts below.

### Fuel Consumption up to 40% better

### Total Cost up to 60% better

(200H of Operation)

## Easy Maintenance

Makita 4-Stroke Engine uses straight unleaded gasoline. Operator can, therefore, skip the following preparation and maintenance required when using 2-Stroke or 4-mix engine that runs on gas/oil mixture:

- Mixing gasoline and oil before operation
- Removing fuel from tank after operation, then sweeping dust from oil filling port\*

\* Removing fuel is recommended for 4-Stroke engine at the end of season.

## Low Noise

Low noise level allows to operate without disturbing others even in quiet places such as parks or residential areas.

### Electric Chain Saw

**UC4041A: 400mm (16")**

#### 1 Improved oil pump.

keeps the delivery of chain oil constant regardless of the temperature and the oil viscosity.

#### 2 Large view window of Oil tank.

allows operator to easily check oil level.

#### 3 Large separate-type metal spike bumper

An optimum design has been achieved by employing separate-type. The spike grips workpiece firmly to provide more control.

#### New adjustment lever for easier tool-less saw chain/ tension adjustment.

### FEATURES

approx.  
**50**  
hours

#### LONGER LUBRICATION CYCLE

Obtained by circulating grease in gear housing. Our current models and competitor's models have approximately 20hours.

#### BLADE TEETH WITH 3 SHARPENED EDGES

Stain-free shear blade surface of glittering silver obtained by non-electrolyzed nickel plating that features high anti-abrasion surface for long lasting coating.

#### ANTI-VIBRATION SYSTEM

Equipped with floating structure of engine section and handle section for anti-vibration. Four damper springs absorb vibration from engine to integrated front and rear handles.

#### 5-POSITION ROTATING REAR HANDLE

[only for EH6000W & EH7500W]  
Can be locked at "0" degree & "45"/"90" degrees left and right for vertical & angled trimming.

### String Trimmer

UR3000 : 300mm (11-3/4")

## Can be used as an edger

#### Adjustable pipe shaft

Simply by touching the button, the length can be adjusted to user's height by up to 240mm.

Adjustment  
range  
240mm

Motor head  
rotates 180°

#### Bump & Feed cord feeding system

Nylon cord can be fed by tapping the spool end on the ground.

#### Dual-cord cutting

(using the both ends of a nylon cord 8m in length and 16.5mm in diameter.

Slide type lock-off switch  
for safe operation

Strain relief  
on main handle  
prevents extension  
cord from disconnecting.

Adjustable loop handle  
allows for angle adjustment  
according to user's height and working posture

#### Easy to remove/install spool assembly

Spool assembly can be easily removed by pushing in two locking tabs at once. Additionally, its compact design allows small handed user to push in the tabs with ease.

The spool end is metal capped  
for increased wear resistance.

#### 1 Ergonomic Handle with Cruise control lever and thumb rest.

Cruise control lever for constant air volume in continuous operation.

Thumb rest for more comfort and less hand fatigue in long continuous operation.

Ergonomic rubberized handle provides more control and less operator fatigue.

#### 2 Quick start and easy maintenance.

#### 3 Sliding "Plug Cover".

- Allows easy access to spark plug.
- Designed not to be removed from its position for protection against loss.

#### 4 Fuel Tank Ergonomically Contoured.

For use as an auxiliary handle in vacuum operation.

#### 5 Clean exhaust emission and low fuel consumption.

#### 6 Oil filling Port

Large opening port for easy oil inspection and oil change.

## Rescue Force Diamond Blade

Every second counts when passengers have to be rescued from aeroplanes and trains. Now at last there is an efficient, tried and tested cutting disc that can cut open aeroplanes and high-speed trains and cut through crash barriers.

- The Diamond Rescue Force cutting disc cuts through all materials.
- It cuts effortlessly through alloys, steel, safety glass, concrete, carbon-fibre reinforced plastic and armoured glass.
- The Rescue Force rescue disc has much bigger diamonds than traditional cutting discs.
- Rescue Force cuts to a depth of up to 125mm. It is fast and reliable where other cutting discs fail.
